EDUCATION

B.S., Computer Science-Cybersecurity Concentration

High Point University
3.350

May 2027
High Point, NC

- Dean's list recipient 2024 and 2025

EXPERIENCE

Service Agent (Seasonal)

Avis Budget Group

May 2024 - August 2025
Pittsburgh, PA

- Detailed and prepped a fleet of up to 40 rental vehicles daily, improving turnaround time and readiness for customer pickup
- Maintained vehicle performance by refilling gas, topping off fluids, and checking tire pressure—helping reduce service delays for customers
- Responded to radio alerts and prioritized high need vehicles, enabling timely delivery and pickup for customers in a hurry

Crew Member

Five Guys

June 2023 - August 2023
Moon, PA

- Prepared and cooked burger patties up to 100 burgers a day and operated fry station during peak periods, supporting high-volume service and maintaining quality standards
- Handled cash and card transactions with accuracy, while providing friendly service contributed to a positive dining experience
- Practiced food-safety procedures to uphold hygiene standards and minimize service disruptions

Usher

Cinemark

June 2021 - August 2021
Pittsburgh, PA

- Scanned up to 100 tickets per hour and guided guests to correct theaters with clear instructions, supporting an efficient and welcoming arrival experience
- Monitored theater and common-area cleanliness, prepared next-show seating cleaning 40 seats per theater quickly, and upheld hygiene standards in restrooms and hallway
- Balanced multiple tasks in a fast-paced environment, helping keep showtimes on schedule and guests satisfied

Intern

RiversEdge Retirement Solutions

June 2020 - August 2020
Sewickley, PA

- Digitized and organized over 50 paper invoices per hour into searchable PDF files, improving record accessibility and reducing physical storage
- Sorted and indexed invoices alphabetically, improving retrieval time and filing efficiency
- Performed quality-checks on scanned documents to ensure accuracy and completeness, enhancing data integrity

PROJECTS

- Designed and tested sorting algorithms to compare performance on large data sets up to 100,000 integers
- Researched and demonstrated a real software vulnerability in a controlled lab using an older version of Adobe Flash.
- Built a functional CPU in Logisim, constructing the ALU and registers
- Performed a controlled web app penetration test on a professor-built site, exploited two vulnerabilities to obtain user credentials, and analyzed security weaknesses

SKILLS

- Experience with penetration testing & vulnerability exploitation, worked with Virtual lab environments, Proficient in C++ with working knowledge of Python and Java
